OPERATIONS & FINANCIAL MANAGEMENT SUITE

Madina Shareef Travels & Tours

Comprehensive System User Manual & Complete Feature Reference Guide

Software Version	Version 2.0 (Production Release)
Architecture	Laravel 10 Enterprise Framework / MySQL / Blade Components
Target Audience	Super Admins, Tour Operators, Ticketing Specialists, Accountants, CRM Staff
Scope of Features	Groups & Vouchers, Airline Ticketing, User RBAC, CRM, Petty Cash, Expenses
Publication Date	October 2026
Security Classification	Confidential • Proprietary Operational Manual

© October 2026 Madina Shareef Travels (Pvt) Ltd. All Rights Reserved.

Table of Contents

This manual provides an authoritative walkthrough of all application features, user roles, operational workflows, and data security controls.

01	System Overview & Operational Architecture	Page 3
02	Executive Dashboard & Real-Time Financial Intelligence	Page 4
03	User Management, Roles & Role-Based Access Control (RBAC)	Page 5
04	Travel Groups & Umrah Operations (Hotels, Flights, Mutamers)	Page 6
05	Travel Vouchers (Flight Numbers, Remarks Box, QR Verification)	Page 7
06	Airline Ticketing Engine & Flight Segment Management	Page 8
07	Polio Invoices, Health Compliance & Medical Billing	Page 9
08	Client Records & B2B Sub-Agent Commission Portal	Page 10
09	CRM Pipeline, Inquiry Tracking & Follow-Up Automation	Page 11
10	Petty Cash Daily Register & Day Balancing Workflow	Page 12
11	Monthly Overhead Expenses, Utility Bills & Recurring Liabilities	Page 13
12	Human Resources, Employee Payroll & Printable Salary Slips	Page 14
13	Security Hardening, Password Policies & Audit Logs	Page 15
14	Master Permissions Matrix (110 Keys Reference)	Page 16

> **Quick Guidance:** Each chapter includes practical user steps, form field specifications, action button definitions, and operational best practices.

01. System Overview & Architecture

1.1 Core Mission

The **Madina Shareef Travels Management Suite** is a modern ERP application built to orchestrate all facets of travel management—specializing in Umrah and Hajj packages, international airline ticketing, client accounts, petty cash reconciliation, and staff payroll.

1.2 Role-Based Access Control (RBAC) Structure

The application strictly segregates duties according to organizational roles:

SYSTEM ROLE	USER PROFILES	PERMISSIONS & KEY RESPONSIBILITIES
Super Admin	Directors & Owners	Full system sovereignty. Unlimited visibility into revenue, company profits, staff accounts, system settings, and audit trails.
Branch Manager	Operations Heads	Complete operational control across Travel Groups, Airline Tickets, Daily Registers, CRM Pipeline, and Salaries.
Tour Operator	Umrah / Group Coordinators	Manages pilgrim manifests, flight allocations, Makkah/Madinah hotels, transport contractors, and travel voucher printing.
Ticketing Agent	IATA Ticketing Specialists	Direct ticket issuance, PNR record lookup, flight segments, fare calculations, and commercial passenger invoice generation.
Accountant	Finance & Cashiers	Daily cash register entries, day closing balancing, monthly utility bills, recurring overhead expenses, and salary disbursements.
Sales / CRM Officer	Client Relationship Execs	Lead intake, client database updates, quotation delivery, and negotiation tracking through the 5-stage sales pipeline.

1.3 Intelligent Operational Landing Redirection

To prevent security leaks, users without executive financial privileges (e.g. Sales or Ticketing agents lacking `dashboard.view`) are automatically redirected upon login directly to their designated operational desks (e.g. `/crm/pipeline` or `/airline-tickets`) with a friendly notification.

02. Executive Dashboard & Financial Intelligence

2.1 Real-Time Financial Indicators

The Executive Dashboard calculates key financial metrics dynamically across all revenue and expenditure ledgers in real time:

FINANCIAL METRIC	UNDERLYING FORMULA & DATA SOURCES	STRATEGIC BUSINESS PURPOSE
Total Revenue	Airline Ticket Total Fares + Polio Invoices + Group Bookings	Displays gross value invoiced to date across all operational business lines.
Total Expenses	Monthly Overhead Expenses + Disbursed Salaries + Petty Cash	Tracks the company's total operating expenditure and branch office commitments.
Net Cash Flow	Total Cash Collected minus Total Settled Expenses	Reflects retained operational cash liquidity currently on hand in registers and banks.
Outstanding Balance	Ticket Pending Balances + Polio Unpaid Amounts + Client Balances	Alerts accounting to active collection receivables waiting in the recovery pipeline.

2.2 Operations Portfolio Cards

Four interactive stat cards provide immediate operational visibility and one-click navigation:

- **Airline Tickets:** Total tickets issued in the system. Links directly to `/airline-tickets`.
- **Travel Groups:** Total tour and Umrah delegations registered. Links to `/travel-groups`.
- **Issued Vouchers:** Total official travel vouchers generated. Links to the vouchers section.
- **Clients & Mutamers:** Total customer profiles stored in the CRM. Links to `/clients`.

2.3 Flight Schedule Surveillance & Quick Action Center

The dashboard includes real-time operational widgets to ensure seamless passenger departures:

- **Departing Today:** Live counter indicating flight segments taking off within the current calendar day.
- **Departing Next 7 Days:** Rolling forward schedule for early transport and hotel coordination.
- **Quick Actions Toolbar:** One-click rounded buttons to *Issue Ticket*, *Create Travel Group*, *New Polio Invoice*, or *Add Monthly Expense*.

03. User Management, Roles & RBAC

3.1 User Directory & Lifecycle (`/users`)

The user management system enables Super Admins to provision staff accounts, manage credentials, and control access permissions.

1. **Provision New User Account**
   Navigate to **User Management > Add New User**. Input Full Name, Corporate Email Address, Mobile Phone, Department, and assign an appropriate System Role.
2. **Temporary Credential & Forced Password Reset**
   Enter a temporary password. When *Force Password Change* is checked, the staff member is automatically redirected to a private reset screen on their first login.
3. **Status & Session Control**
   Admins can toggle account status between **Active** and **Inactive**, trigger instant temporary password generation, or execute **Revoke All Sessions**.

3.2 Roles & Granular Permissions Matrix (`/roles`)

The suite distinguishes between roles (job titles) and permissions (granular capability keys):

MODULE SCOPE	SAMPLE PERMISSION KEYS	OPERATIONAL IMPACT
Dashboard Control	`dashboard.view` `dashboard.financial`	Regulates access to the dashboard interface and protects sensitive revenue/profit totals.
Groups & Vouchers	`travel_groups.create` `travel_vouchers.print`	Governs who can create tour packages, adjust hotel contracts, or generate printed vouchers.
Airline Ticketing	`airline_tickets.create` `airline_tickets.payments`	Enables ticket issuance and customer payment recording while restricting unauthorized cancellations.
Administration	`users.create`, `roles.edit`	Restricted to Super Admins to protect core authorization tables.

Self-Deletion Safeguard: The application forbids administrators from deleting their own user account or deactivating the last remaining active Super Admin.

04. Travel Groups & Umrah Operations

4.1 Overview of Travel Group Management (`/travel-groups`)

The **Groups / Travel** module serves as the primary operational container for organized tour delegations and Umrah pilgrims. Every group is tracked through an integrated manifest:

- **Group Header:** Unique Group Code (e.g. `UMR-001`), Title, Service Type (Umrah, Hajj, Tour, Ziyarat), Departure & Return Dates, and Status.
- **Pilgrim Manifest:** Complete list of mutamers, passport numbers, visa details, package rooming types, bed numbers, and payment status.
- **Flight Schedules:** Outbound and Return flight legs, airline flight numbers, departure/arrival airports, dates, and times.
- **Hotel Bookings:** Accommodations in Makkah and Madinah, check-in/out dates, meal plans, and confirmation numbers.
- **Ground Transportation:** Bus, Coaster, or private car assignments, transporter contacts, pickup points, and drop-off locations.

4.2 Step-by-Step Group Lifecycle Guide

1. **Create the Travel Group Header**
   Click **+ Add Travel Group**. Provide an identification code (e.g. `UMR-2026-OCT`), select the Service Type (e.g. Umrah), set departure/return dates, and assign a Group Leader.
2. **Attach Outbound & Inbound Flights**
   On the group page, under *Flights*, click **+ Add Flight**. Specify Flight Type (Departure or Return), Flight Number (e.g. `SV-735`), Sector (e.g. `LHE - JED`), and Date/Time.
3. **Record Makkah & Madinah Hotels**
   Under *Hotels*, click **+ Add Hotel**. Select City (Makkah or Madinah), Hotel Name, Room Type (Sharing, Quad, Triple, Double), Check-In Date, and Check-Out Date.
4. **Enroll Mutamers / Clients**
   Under *Clients*, click **+ Add Client**. Enter Passenger Name, Passport Number, Contact Phone, Room Type, Bed Number, and Payment Status (Paid, Partial, Pending).

GROUP STATUS	OPERATIONAL MEANING	SYSTEM ACCESS & RESTRICTIONS
Draft	Group is being prepared	Flights and hotels can be edited freely before generating official vouchers.
Confirmed	Visas & tickets confirmed	Enables official travel voucher generation and pilgrim manifests.
Travel Completed	Delegation has returned	Group is archived for historical reporting and accounting audit.

05. Travel Vouchers System

5.1 Importance of the Travel Voucher

The **Travel Voucher** is the official legal document required by civil aviation authorities, the Ministry of Hajj & Umrah, and border control agents. It serves as tangible verification of round-trip flights, hotel bookings, ground transportation, and licensed sponsorship.

5.2 Flight Numbers & Comments Box Features

In Version 2.0, two critical features have been integrated into the voucher engine:

- **Explicit Flight Numbers Engine:** Inbound and Outbound flight numbers (e.g. `SV-735` and `SV-481`) are systematically extracted from the group's flight schedule, pre-filled into editable fields during voucher creation, and rendered clearly on the printed document.
- **Dedicated Voucher Comments / Remarks Box:** A designated text area allows operators to enter special pilgrim handling instructions (e.g., *"Wheelchair assistance required at Jeddah Airport"*, *"VIP Family - Deluxe Room near Haram"*, or transporter emergency contact numbers). This comment box is stamped directly onto the printed voucher.

5.3 Step-by-Step Voucher Generation & Verification Flow

1. **Initiate Voucher Creation**
   From the Travel Group detail page (`/travel-groups/{id}`), scroll to **Travel Vouchers** and click **+ Add Voucher**.
2. **Review Pre-Populated Flights & Hotels**
   The voucher engine automatically aggregates all mutamers, hotels, and flight legs from the group. Confirm or adjust Departure/Return Flight Numbers, Sectors, and Timings.
3. **Input Operational Remarks**
   Enter group instructions into the **Voucher Comments / Remarks** box. Click **Generate & Save Voucher**.
4. **Print & Public QR Verification**
   Click **Print Voucher** for a clean letterhead format. Each printed voucher includes an encrypted QR code. Anyone scanning the QR code is redirected to `/voucher/verify/{token}` for instant verification.

> **Voucher Revision:** If airline schedules change or hotels are upgraded, operators can click **Edit Voucher** on any existing voucher to update flight numbers, dates, or comments without deleting the document.

06. Airline Ticketing & Flight Segments

6.1 Ticketing Dashboard & Operations Surveillance

The Airline Ticketing Module (`/airline-tickets`) manages individual seat bookings, corporate tickets, and group tickets across major carriers (PIA, Saudia, Emirates, Fly Jinnah, Airblue, Qatar Airways).

6.2 Comprehensive Ticket Creation Flow

1. **Passenger & PNR Information**
   Select the Direct Customer or B2B Sub-Agent. Input the global **PNR (Passenger Name Record)**, GDS Booking Reference, Ticket Date, and Ticket Type (One-Way, Round-Trip, or Multi-City).
2. **Multi-Segment Flight Builder**
   Add flight segments. For each leg, select the Airline, Flight Number, Departure Airport, Arrival Airport, Departure Date & Time, and Arrival Date & Time.
3. **Passenger Manifest**
   Input passenger names, passport numbers, and passenger categories (Adult, Child, Infant). Multiple travelers sharing the same PNR are linked automatically.
4. **Financial Calculation & Payments**
   Input Basic Fare, Taxes, Airline Charges, and Service Charges. The system calculates Net Supplier Cost and Total Selling Price. Record initial cash or bank payments to establish the account balance.

ACTION BUTTON	ROUTE / HANDLER	OUTCOME & DELIVERABLE
View Details	`/airline-tickets/{id}`	Displays passenger roster, itinerary route map, payment ledger, and invoice balances.
Edit Ticket	`/airline-tickets/{id}/edit`	Allows adjusting status (Confirmed, Reserved, On Hold, Void), PNR locator, and fare totals.
Commercial Invoice	`/airline-tickets/{id}/invoice`	Generates an official client invoice with itemized tax breakdown, payment record, and balance due.
Download PDF	`/airline-tickets/{id}/invoice/pdf`	Compiles an immediate PDF invoice download for emailing or accounting filing.
Print Ticket	`/airline-tickets/{id}/print`	Clean passenger e-ticket layout formatted for paper or PDF ticket handover.

07. Polio Certificate Invoices & Health Compliance

7.1 Purpose & Regulatory Requirement

International pilgrimage regulations mandate valid Polio / Meningitis vaccination certificates for travelers departing Pakistan for Saudi Arabia. The Polio Certificate Invoice module (`/polio-invoices`) streamlines certificate billing:

- **Automated Sequential Numbering:** Generates formatted invoice identifiers (e.g. `POLIO-INV-00001`).
- **Cost & Person Calculations:** Operators input the Number of Persons and Rate per Person; the total amount is auto-calculated.
- **Payment Tracking:** Supports partial and split payments, automatically updating payment status between *Pending*, *Partially Paid*, and *Paid*.
- **PDF & Print Formats:** Immediate access to printable client invoices with official company verification stamps.

7.2 Step-by-Step Polio Invoice Workflow

1. **Create New Invoice**
   Click **+ New Polio Invoice**. Enter Customer Name, Contact Number, and Invoice Date.
2. **Set Pilgrims & Rate**
   Enter the Number of Persons (e.g. 4) and Cost Per Person (e.g. `PKR 1,500`). Total Amount calculates automatically (e.g. `PKR 6,000`).
3. **Record Initial Receipt**
   Enter amount paid at counter. If full payment is made, status becomes Paid. If partial, status becomes Partially Paid.
4. **Print Client Receipt**
   Click **Print Invoice** or **Download PDF** to generate the official stamped receipt for the passenger.

INVOICE STATUS	CONDITION	FINANCIAL LEDGER EFFECT
Pending	Total Paid = 0	Total invoice amount added to Outstanding Receivables on the dashboard.
Partially Paid	0 < Total Paid < Total Amount	Paid amount added to Net Cash Flow; balance remains in Outstanding Receivables.
Paid	Total Paid ? Total Amount	Fully settled; zero outstanding balance.

08. Client Records & B2B Partner Portal

8.1 Client Records Management (`/clients`)

The client directory maintains permanent records for walk-in travelers, corporate groups, and repeat pilgrims:

- **Personal Identifiers:** Full Name, Father's Name, CNIC, Passport Number, Passport Expiry, and Mobile/WhatsApp.
- **Reference & Vendor:** Reference category (Direct, B2B Agent, Walk-In) and assigned account executive.
- **Booking History:** Direct association with all historical airline tickets, travel groups, and ledger payments.

8.2 B2B Agent Management & Commission Ledger (`/b2b`)

For partner travel agencies and sub-agents booking through Madina Shareef Travels, the B2B portal tracks:

FEATURE COMPONENT	CONFIGURATION / INPUT	OPERATIONAL IMPACT
Agency Profile	Agency Name, Contact Person, City, Credit Limit	Establishes the trading credit line and authorized booking thresholds.
Commission Type	Percentage (e.g. 5%) or Fixed Amount per Seat	Automatically calculates sub-agent commission on every issued ticket or group package.
Agent Statement	Comprehensive date-filtered transaction ledger	Summarizes total bookings, gross sales, commissions credited, and net payable/receivable balance.
Payment Slips	Settlement recording with formal printable slip	Documents commission payouts or credit clearances for official audit trails.

> **Agency Statement Generation:** Navigate to `/b2b-agents/{id}/statement` to filter bookings by custom date ranges and export a clean statement of accounts for sub-agents.

09. CRM, Inquiry Pipeline & Follow-Ups

9.1 The 5-Stage Sales Funnel (`/crm`)

The CRM module converts inquiries into confirmed bookings through a 5-stage sales funnel:

FUNNEL STAGE	ACTION PERFORMED	NEXT STEP & TRANSITION
1. New Inquiry	Lead captured from walk-in, phone, or WhatsApp	Assigned to a sales officer for initial contact.
2. Contacted	Agent gathers passenger counts, dates, and budget	Prepares tailored quotation options for hotels and flights.
3. Quotation Sent	Formal package proposal delivered to client	Agent schedules a follow-up reminder call.
4. Negotiating	Adjusting package dates, room types, or payment terms	Closing contract and securing advance deposit.
5. Won / Converted	Advance payment received	Converted directly into an active Booking, Airline Ticket, or Group Client.

9.2 Follow-Up Reminders & Activity Logging

To ensure zero dropped inquiries:

- **Activity Logging:** Every phone call, WhatsApp conversation, or office visit is logged under the lead's history.
- **Follow-Up Due Dates:** Sales agents can set automated follow-up dates and times. Overdue follow-ups appear highlighted in the agent's CRM dashboard.

10. Financial Control: Petty Cash Daily Register

10.1 Daily Register Workflow (`/petty-cash/daily`)

Ensures strict cash integrity for daily counter operations:

> **Daily Cash Balance Formula:**
> `Closing Cash = Opening Balance + Daily Collections (Cash In) - Daily Petty Expenses (Cash Out)`

10.2 Step-by-Step Daily Balancing Procedure

1. **Morning Opening Cash**
   Cashier opens `/petty-cash/daily`. The system carries forward the previous day's verified closing balance as the Opening Cash.
2. **Logging Cash Inflows & Outflows**
   Click **+ Add Transaction**. For inflows (ticket collections, advance booking cash), select *Cash In*. For office expenses (tea, fuel, couriers), select *Cash Out* and input recipient name and description.
3. **Print Transaction Voucher**
   Each individual transaction generates a printable petty cash voucher with signatures for Paid By and Received By.
4. **Evening Day Close**
   At end of business, the cashier counts physical cash in drawer, verifies match with system balance, and clicks **Close Day** to lock the register.

> **Security Lock:** Once a day register is marked as *Closed*, no further transactions can be added to that date without administrator override, preventing retroactive ledger alterations.

11. Monthly Expenses & Utility Bills

11.1 Expense Categories & Cost Centers (`/monthly-expenses`)

Tracks recurring office liabilities, tenancy contracts, and utility bills:

COST CENTER	TYPICAL LINE ITEMS	PAYMENT CYCLE
Office Rent & Facilities	Main Office Tenancy, Branch Office Rent, Maintenance Charges	Monthly (1st to 5th of each month)
Utility Bills	Electricity (LESCO), Gas (SNGPL), Internet/Fiber (PTCL), Water	Monthly against bill due dates
Software & Infrastructure	GDS Terminals (Sabre, Amadeus), Server Hosting, Domain renewals	Monthly / Annual Subscriptions
Legal & Licensing	DTS Tourism License, IATA Fees, Chamber of Commerce dues	Annual / Quarterly

11.2 Utility Bill Tracker & Overdue Alerts

The Utility Bills module tracks consumer account numbers, utility providers, and due dates. The dashboard automatically flags upcoming bills (within 7 days) and triggers warning badges for overdue accounts.

11.3 Recurring Expenses Automation

Navigate to `/monthly-expenses/recurring`. Administrators define fixed recurring liabilities once (e.g. *Office Rent PKR 60,000 due on 1st*). Clicking **Generate Monthly Expenses** automatically creates the expense records for the current billing cycle in one step.

12. Human Resources, Payroll & Salary Slips

12.1 Employee Directory (`/employees`)

Maintains staff employment profiles:

- **Personal Details:** Full Name, CNIC, Mobile Phone, Home Address, Emergency Contact.
- **Employment Terms:** Designation, Department, Date of Joining, Employment Status (Active / Resigned).
- **Compensation Structure:** Basic Monthly Salary, Fixed Allowances, and Authorized Deductions.

12.2 Monthly Payroll Generation (`/salary`)

1. **Generate Payroll Run**
   Click **Generate Monthly Salaries**. The system populates salary records for all active employees for the selected month with their pre-configured basic salary.
2. **Apply Bonuses & Deductions**
   Click **Edit** on an employee's salary record to add commissions, performance bonuses, advance deductions, or tax withholdings.
3. **Disbursement & Settlement**
   When salary is transferred via bank or cash, click **Mark Paid**. The payment status changes to Paid and records the disbursement date.
4. **Print Salary Slips**
   Click **Salary Slip** to generate the official employee pay slip displaying Gross Pay, Deductions, and Net Disbursed Salary.

13. Security Policies & Audit Trails

13.1 Security Hardening Configuration (`/security-settings`)

Enterprise protection mechanisms designed to prevent unauthorized access and data loss:

DEFENSE MECHANISM	CONFIGURATION SETTING	SECURITY PURPOSE
Password Complexity	Minimum 8 characters, uppercase, numbers, symbols	Prevents weak passwords and dictionary attacks.
Failed Login Lockout	Configurable (e.g. 5 consecutive failed attempts)	Locks the account automatically and records IP to Login History.
Session Idle Timeout	15, 30, or 60 Minutes of Inactivity	Auto-terminates abandoned browser sessions on office workstations.
Emergency Revocation	Instant "Revoke Other Sessions" button	Invalidates all active login tokens across all devices immediately.

13.2 Activity Logs & Login History (`/activity-logs`, `/login-history`)

The security engine maintains permanent, immutable records of all system interactions:

- **Audit Trail:** Records User ID, Model Name, Action (Created, Updated, Deleted), and Timestamp.
- **Login History:** Captures IP Address, Browser User-Agent, Date/Time, and Status (Success , Failed , or Locked).

14. Master Permissions Reference Matrix

Full operational mapping of all 110 system permission keys across all 12 modules:

MODULE NAME	PERMISSION KEY IDENTIFIER	FUNCTIONAL ACCESS SCOPE
Dashboard	`dashboard.view` `dashboard.financial`	Dashboard access Visibility into executive profits and cash totals

User Management	`users.view`, `users.create`
	`users.edit`, `users.delete`
	`users.reset_password`, `users.toggle_status`
		Inspect user directory
		Create & edit staff profiles
		Reset credentials & activate/suspend accounts

Roles & Permissions	`roles.view`, `roles.create` `roles.edit`, `roles.delete`	View role definitions Assign & configure granular permission matrix
Travel Groups	`travel_groups.view`, `travel_groups.create` `travel_groups.edit`, `travel_groups.delete`	View Umrah & Tour delegations Create, edit schedules, manage hotel allocations
Travel Vouchers	`travel_vouchers.view`, `travel_vouchers.create` `travel_vouchers.edit`, `travel_vouchers.print`	View voucher list & QR codes Generate vouchers with flight numbers & comments Print official pilgrim travel vouchers

Airline Ticketing	`airline_tickets.view`, `airline_tickets.create`
	`airline_tickets.edit`, `airline_tickets.delete`
	`airline_tickets.payments`
		Ticketing dashboard & inventory
		Issue and modify PNRs and flight segments
		Record customer payment installments

Polio Invoices	`polio_invoices.view`, `polio_invoices.create` `polio_invoices.edit`, `polio_invoices.delete`	Health certification billing Record pilgrim medical payments & print receipts
Clients & B2B	`clients.view`, `clients.create` `b2b.view`, `b2b.payments`	Client database access B2B sub-agent ledger & commission payout
Petty Cash	`petty_cash.view`, `petty_cash.create`	Daily register inflows/outflows & day closing lock
Monthly Expenses	`monthly_expenses.view`, `monthly_expenses.create`	Overhead utility bills, recurring liabilities, reports
Employees & Payroll	`salary.view`, `salary.create`	Team payroll generation, pay slips, salary settlement
CRM Funnel	`crm.view`, `crm.create`, `crm.pipeline`	Inquiry capture, lead tracking, sales funnel stages
